STOCK COUNTING.

It's what we do.

StockCounters provides an affordable, independent, turnkey stock take solution for clients across various business sectors. Through the use of your existing barcodes, StockCounters delivers strategic input, customised in-house software and skilled labour teams which result in real-time snapshots of your stores' stockholding.

THE THREE STOCKCOUNTERS' SOLUTIONS

Technology – our technology, your staff

- Available as part of the turnkey solution or as an independent technology solution to be used by your own staff only
- Use of the latest Symbol memory scanners
- Robust and proprietary software, developed and tested over 13 years, and tailored for your specific needs
- Software interfaces with all POS systems - no additional development on your end
- Online Calendar Schedule with a client login on the StockCounters web site provides you with the ability to manage stock take diaries real time
- Proven technology - over 10 000 successful “tried and tested” stock takes in multiple geographies over the past 13 years
- Best practices learned over time and distilled into the perfect solution for you
- Broad range of client partner experiences

Labour – our staff, your systems

- Available as part of the turnkey solution or as an independent labour solution
- Appropriately qualified: Numeracy and literacy tested
- Independent, experienced stock-takers
- Trained “The Stockcounters Way” to confidently handle both your and our specific stock taking and scanning methods and systems
- Appropriately attired in easily recognisable StockCounters corporate wear
- Our professional teams of stock counters cover all of South Africa

Our turnkey solution allows you to entrust your entire stock taking process to us. Alternatively our independent technology and/or labour solutions may be made available to you in support of your existing stock take requirements.

StockCounters takes the hard work out of taking stock. For the past 13 years we have developed the necessary expertise and tools required to conduct Electronic Scanning Stock Takes – accurately and hassle free. Using the latest in scanner technology, and a proprietary, standalone software package, StockCounters provides the stock taking solution that works for you.

StockCounters' stocktaking footprint covers the whole of South Africa with offices in the four major South African metropolitan centres - Johannesburg, Cape Town (Headquarters), Durban and Port Elizabeth – covering the whole of South Africa, Namibia, Botswana, Swaziland and Lesotho. StockCounters has the capacity to deliver simultaneous stock takes in multiple stores nationally.

StockCounters provides a stock taking solution that works for you. Ranging from our turnkey solution (i.e. the full package) to our technology only or labour only packages:

Turnkey – taking the hard work out of taking stock

StockCounters provides an affordable, independent, turnkey stock take solution using existing barcodes, strategic and operational input, proprietary, robust software, and trained and qualified labour to deliver a real-time snapshot of your stores' current stockholding.

Sit back and let us take the hassle out of your stock taking requirements with our turnkey solution. Alternatively take advantage of one of our independent technology or labour solutions that best meet your business's needs. Whatever you require you can count on us for your stock taking solution.

Benefits to using StockCounters

Commercial

- Faster, more efficient stock takes: save you from closing your store and losing trade
- No overtime charges
- Zero capital outlay – all equipment for scanned stocktakes is provided
- StockCounters in-house hardware and software means that our direct costs are recovered across multiple clients, resulting in overall reduced costs for you the client
- StockCounters approved solution is audited and accredited by our clients' auditing and finance departments
- Standalone system

Customer satisfaction

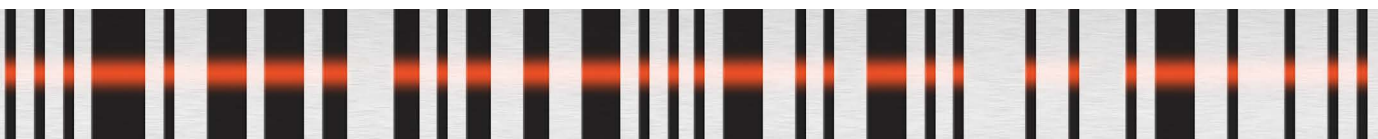

- Store closures during working hours are a thing of the past – we work around your trading hours
- Same cost to you irrespective of time of day or day of week
- Store is prepped and ready for trade the following day.

Staff satisfaction

- Focus on the joy of the job, not the grudge of stock taking
- Client facing staff are not fatigued the following day

Strategic part of your business cycle

- Highlight seasonal shifts – unseasonable items picked up instantaneously
- Manage stock holding – no errors through incorrect capture methods
- Tight financial control
- Real time asset management

STOCK COUNTERS.

Making technology count.
